Attention: Mr. Robert Scott

Subject: Quarterly Report No. 32
Fourth Quarter 2009 Full-Scale SVE System
Boeing Real Property Management
Former C-6 Facility, Building 1/36 Area
Los Angeles, California

Dear Mr. Scott:

Haley & Aldrich, Inc. (Haley & Aldrich) has prepared this letter report to summarize the fourth quarter 2009 soil vapor extraction system (SVE) activities at the Former C-6 Facility, Building 1/36 Area in Los Angeles, California (Site). This letter report has been prepared in response to the Los Angeles Regional Water Quality Control Board's (LARWQCB's) reporting requirements and is being submitted in lieu of a full quarterly report because the SVE system was not operated during the fourth quarter of 2009.

Full-scale SVE operations were discontinued in September 2009 to perform soil vapor sampling and evaluate off-gassing and associated migration of vapors through the soil column. Per the LARWQCB's approval letter, results from the vapor sampling are required be submitted to the LARWQCB no later than 31 July 2010. Because the SVE system will remain off, and restarting the SVE system will be based on the results of the soil vapor sampling, we recommend that the frequency of reporting be reduced from quarterly to semi-annually. Should the SVE system be restarted, the reporting frequency would return to quarterly.

We appreciate the opportunity to provide environmental consulting/engineering services on this project. Please do not hesitate to call if you have any questions or comments.
